

# Call For Participants

How do individuals understand delusions without psychiatric intervention?

90 min(s) to complete

Sincere Gratitude (from the researcher) and the knowledge that you are informing future...

Interview

Central London, London WC2N 5DU, UK

Metanoia Institute

This is a study focusing on how people who have experienced apparent delusions make sense of them, and integrate them, without psychiatric intervention. I will be exploring the processes through which individuals understand prior experiences of extremely subjective unconventional beliefs (typically diagnosed as 'psychotic delusion') outside the medical model.

For this particular study, participants will no longer be experiencing these beliefs, but will have had experience of them in the...
