

Call For Participants

Relationship of personality ,
mental health and chatgpt for
self-disclosure

15 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

University of Wolverhampton

This research aims to understand psychological factors influencing interactions with ChatGPT. This information will contribute to understanding the relationship between psychological factors and self-disclosure in ChatGPT interactions and enhance the ethical and practical development of AI tools for mental health support. The questionnaires are confidential and participants will remain anonymous.
