

# Call For Participants

Views on cannabis-based medicines for anxiety in autistic people

10 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

King's College London

This project aims to understand views on cannabis-based medicines for anxiety in autistic people. Participation will involve an online anonymous survey, which takes around 10 minutes to complete. The survey will ask you questions about yourself (for example, age, gender), anxiety symptoms and treatments you have tried, and your views on cannabis-based medicines and the design of a clinical trial to test these medicines.
