

Call For Participants

Associations between stages of menopause, alcohol use, and wellbeing.

20 min(s) to complete

Prize draw at the end of the study: 2 x £50 / 3 x £25 / 5 x £10 shopping vouchers to win.

Online Questionnaire

Online

Liverpool John Moores University

This study aims at answering the following question: What is the role of alcohol in women's lives as they transition through menopause?

As such, this study will investigate the associations between alcohol consumption, menopause stages and symptoms, wellbeing, and the factors that affect these associations over time.

Participants will complete fortnightly online surveys asking questions on these topics over 6 months (12 surveys in total).

This study is part of a larger PhD project.
