Stress and wellbeing in University Students? A cross-national study.

25 min(s) to complete

Prize draw

Online Questionnaire

Online

King's College London

The purpose of this study is to explore the effect of stress on well-being in university students studying in Saudi Arabia and the UK. In addition, a secondary purpose of the study is to examine the moderating effects of religiosity, belongingness, family dynamics, and social support on the relationship between stress and well-being. You will be redirected to qualtrics to take the survey.
