Tips for Tots

30 min(s) to complete

Sincere Gratitude

Interview

London, UK

University College London

We are now recruiting parents of preschool aged children for a research study - Tip for tots. This study is aimed to improve communication between healthcare professionals and parents on the issue of childhood obesity. We would like to find out from any parents of young children how they think a healthcare professional could raise the issue of a young child being overweight or obese, in a sensitive manner during routine appointments. The research will involve an interview (less than 30-min).
