

Call For Participants

Bipolar disorder: How does my mood relate to my brain activity?

300 min(s) to complete

£45 for scan plus £17.5 for smartphone part.

One fMRI scan and 2-week smartphone study (approx. 1 hour per week)

Queen Square, London WC1N, U1

University College London

Want to help exciting neuroimaging research into the relationship between mood & brain connections? If you have a bipolar diagnosis, aged 18-45 & near London, join this paid study at University College London. This involves one fMRI scan visit and some decision making games as well a short 2-week smartphone-based study You can also request a digital copy of your brain (does not count as health check).

**If you'd like to take part, please let us know by emailing bimodal@ucl.ac.uk...
