CODA Study: Comorbid Obesity & Depression with Anti-inflammatory Medication

12 week(s) to complete

King's College London

Are you living with obesity and currently taking antidepressant medication that you feel isn't really helping?

Cash

Researchers at King's College London are investigating how an anti-inflammatory medication called minocycline can work as an antidepressant in some people with depression – and we need your help.

Experiment

Denmark Hill, London, UK
