

Call For Participants

CODA Study: Comorbid Obesity & Depression with Anti-inflammatory Medication

12 week(s) to complete

Cash - up to £130

Experiment

Denmark Hill, London, UK

King's College London

Are you living with obesity and currently taking antidepressant medication that you feel isn't really helping?

Researchers at King's College London are investigating how an anti-inflammatory medication called minocycline can work as an antidepressant in some people with depression – and we need your help.

Participants can earn up to £90 for their time. An additional £40 can be earned for completing the 2 optional MRI brain scans.
